

# TTW10H

## Turntable Weight for 12" and 7" - Heavy Weight Edition

The TTW10H is our turntable weight which combines two needful features for every vinyl DJ: A disc stabilizer and an adapter for 7" records.

The difference to the classic TTW10 is the material used for the outer part: The heavy weight edition is machined out of high-grade stainless steel which results in a final weight of 808g/1.78lbs.

The TTW10H features a smart mechanism: The 7" adapter inside the weight is moveable- as soon as you put the weight on a 7", the adapter will fall down through the big hole of the vinyl. Your record is now centered and stabilized by the TTW10. If you place the kit on a 12" record, the adapter will remain in the rear position and stabilizes your warped records. A sticky rubber mat on the bottom side protects your vinyl and allows you

### DIMENSIONS

Ø75mm x 31mm (Ø2.9 x 1.2 inches)

### WEIGHT

808g (1.78 lbs)

### OFFICAL RETAIL PRICE

119 CHF excl. VAT & delivery
