

# TTW10

## Turntable Weight for 12" and 7"

The TTW10 is our turntable weight which combines two needful features for every vinyl DJ:  
A disc stabilizer and an adapter for 7" records.

The TTW10 features a smart mechanism: The 7" adapter inside the weight is moveable- as soon as you put the weight on a 7", the adapter will fall down through the big hole of the vinyl. Your record is now centered and stabilized by the TTW10. If you place the kit on a 12" record, the adapter will remain in the rear position and stabilizes your warped records. A sticky rubber mat on the bottom side protects your vinyl and allows you to control the record in a very direct way.

The TTW10 comes in a neat printed box with a linen bag to take it out to your gigs.

### DIMENSIONS

Ø75mm x 31mm (Ø2.9 x 1.2 inches)

### WEIGHT

466g (1.02 lbs)

### OFFICAL RETAIL PRICE

89 CHF excl. delivery
